■Organizations and Topics Covered

This report covers domestic and overseas subsidiaries, namely Makita Corporation, and covers the topic of environmental protection activities for FYE 2023.

■Period Covered

This report is based on the achievements of activities implemented in FYE 2023 (April 1, 2022, to March 31, 2023).

■Reporting Policy

Our company is engaged in a wide range of environmental protection activities, and this report mainly covers the themes of environmental protection activities that we are focusing our efforts on. In preparing this report, we tried to make sure that those who are not environmental experts will also be able to easily understand the overview of each theme, with the aim to enhance communication with all our stakeholders. In editing and designing the report, we made sure to use appropriate phrasing and colors, and ensured readability.

The company's environmental performance (achievement) data for the period coinciding with the company's fiscal year, which are aggregated as of March 31 every year, are analyzed and the results are published in June.

■Target Audience

All our stakeholders, including customers, business partners, employees, shareholders, local communities, and public institutions

■Publication and Announcement Media

This report is published in PDF format on our company's website and can be downloaded. URL: <https://www.makita.biz/>

■Report Creation Department and Inquiries (If you have any opinions or comments about this report, please let us know.)

Makita Corporation Environment & Facility Control Division Environment Group Email: kankyou@mj.makita.co.jp

Aiming to create a “sustainable recycling-oriented society” that harmonizes the environment with the economy

Looking at the international economic situation during the fiscal year, concerns over a global economic downturn have heightened against the backdrop of factors including high inflation, monetary tightening in various countries and the energy crisis associated with the prolongation of the war in Ukraine.

In this situation, the Makita Group focused on expanding its lineup of cordless products including power tools and outdoor power equipment in the “40Vmax Lithium-ion Battery” series. With respect to production, we worked on building a production system and strengthening management functions to flexibly address changes in the demand environment and geopolitical risks, and improve the efficiency of the Group as a whole. We also work to increase the level of the community-based and customer-

oriented service framework in order to further strengthen trusting relationships with customers around the world. We strive to deepen and develop the market centered on cordless products.

Regarding initiatives toward carbon neutrality, the impact of climate change on society, such as frequent wind and flood disasters, is becoming more serious, and companies are playing an increasingly important role in realizing a decarbonized society. We have identified contributing to a decarbonized society as a material issue that should be prioritized and are stepping up our efforts.

Therefore, the Group is currently working on the realization of a decarbonized society by focusing on cordless outdoor power equipment that does not emit exhaust gases during use as the next pillar of our future business in addition to power tools. In addition, with the goal of reducing our greenhouse gas (GHG) emissions, we have set targets for reducing GHG emissions from our business activities (Scope 1 and 2) by 50% by FY2030 from the FY2020 level and to net zero by FY2040, and reducing GHG emissions from the entire supply chain (Scope 3) to net zero by FY2050.

During the fiscal year ended March 2023, solar panels were installed at the Okinawa Branch in Japan and at multiple overseas locations, including the Thailand Plant, Austria, and Taiwan, and we promoted the use of renewable energy.

We will continue to work on the use of renewable energy and energy conservation in our business activities to achieve GHG emission reduction targets.

“Environmental Report 2023” is published with the objective of presenting the Company’s initiatives for environmental protection activities. I hope this report helps your better understanding for our activities.

June 28, 2023

President, Representative Director

Munetoshi Goto

Environmental Management

Corporate Philosophy

Management Policy/Quality Policy

1. Makita strives to exist in harmony with society (a company that observes laws and regulations, acts ethically and never allows intervention of the anti-social organizations).
2. Makita values its customers (a market-driven company).
3. Makita is managed in a consistent and proactive manner (a company that strives to exist in perpetuity by adhering to a sound profit structure).
4. Valuing a stalwart corporate culture, Makita encourages each individual to perform to his or her highest level (a happy company).

Code of Ethics

1. Honest and ethical conduct; no conflict of interest
2. Compliance with applicable laws and regulations
3. Full, fair, timely and understandable disclosure
4. Accountability for adhering to this Code
5. Enforcement mechanism
6. Approval for waiver of this Code

Code of Conduct

1. Am I acting in accordance with ethical guidelines? (Would I be unashamed in front of anyone?)
2. Am I looking at things from the customer's point of view rather than the company's point of view? (Am I leaning more towards the customer than my supervisor or my colleagues?)
3. Am I acting and thinking independently and taking on challenges? (Am I caught up in past experiences and successes?)
4. Am I persistently improving and innovating technology? (Is there a reason we have to do it this way?)
5. When I am on site, do I respect the opinions there? (Do I accurately gather information and communicate adequately?)

Long term Target: Strong Company

Makita has set itself the goal of contributing to the creation of sustainable society and consolidating a strong position in the industry worldwide as a global supplier of a comprehensive range of tools for creating comfortable homes and living environments, including cordless power tools, battery-operated outdoor power equipment and pneumatic tools.

Basic Policy on Sustainability

1. As a global supplier of a comprehensive range of tools for creating comfortable homes and living environments, Makita will focus on solving environmental problems and other social issues through our main business, and work to achieve a sustainable society.
2. Makita aims to develop in harmony with society, by promoting corporate ethics and compliance, respect for human rights, protection of the environment, quality assurance, responsible procurement activities, etc. In particular, we consider carbon neutrality and other environmental problems to be issues of the highest importance.
3. Makita will engage in highly fair and transparent corporate management, thereby building strong relationships of trust with all our stakeholders.

Our Commitment to SDGs

SDGs stands for Sustainable Development Goals. SDGs is a global initiative aimed at resolving social issues and creating a bright future, and it consists of 17 goals and 169 targets to be achieved by 2030.

Our company's environmental protection activities are related to some of the goals of the SDGs. Therefore, through our commitment to environmental protection activities, we will contribute achieving SDGs.

Initiatives for the TCFD

Recommendations

As the effects of climate change on society, such as high winds and flooding, increase in frequency and severity, the role of companies in achieving decarbonization is becoming more important. Accordingly, we view climate change issues as a high-priority management challenge.

To this end, we are focusing on cordless outdoor power equipment (OPE) that does not emit exhaust gas during use and are actively working to reduce greenhouse gas (GHG) emissions by striving to reach the goal of virtually eliminating GHG emissions from our operations by fiscal 2040 (FYE 2041)

Recognizing the importance of these efforts as well as engaging in dialogue with our stakeholders regarding the impact of climate-related risks and opportunities on our business and other activities, we endorsed the recommendations of the TCFD (Task Force on Climate-Related Financial Disclosures) in 2021

Environmental Vision

The “Go Green” slogan symbolizes Makita’s commitment to continually providing new value as a comprehensive international supplier of tools. We hope to always remain as a company that maintains a steady eye on society, challenging ourselves to create a “sustainable recycling-oriented society” that harmonizes the environment with the economy.

Environmental Policy

Basic Principles

As a global supplier of a comprehensive range of tools for creating comfortable homes and living environments, Makita is aiming to conduct a wide range of environmental protection activities, in order to contribute to having sustainable society and conservation of biodiversity.

Policies

1. Enforcement of environmental administrative structure

To conduct our business in an environmentally and friendly way, we will organize our environmental administrative structure on a global scale.

2. Continuous improvement and pollution prevention

Makita will endeavor to continuously improve the quality of environmental protection activities and prevent from pollution.

3. Compliance with applicable laws and regulations

Makita will comply with applicable laws, regulations and standards concerning the environment.

Moreover, Makita will take preventive action against environmental pollution, based on our environmental principle.

4. Establishment and review of objectives and aims

Makita will endeavor to fully understand environmental impacts we may cause and periodically review the environmental objectives and goals within the technically and economically possible range.

5. Reduction of environmental burden

Makita endeavors to promote the following activities to reduce environmental burden.

- Reduction of green house gas (CO₂) emissions by conservation of resources and energy.
- Reduction of industrial waste and promotion of waste reuse.
- Replacement from substance of environmental concern and emission control.
- Implementation of product assessment and development of environment-conscious products centered around cordless products at the stage of tool design and development

6. Disclosure

Makita will make this environmental policy known to all of our employees through internal communication and will positively announce it to the public.

Topics

Our Commitment to Carbon Neutrality

■Shifting from engine-powered to battery-powered

In the past, the majority of OPE (Outdoor Power Equipment) was engine powered. However, while that provides superior power and stamina, the environmental impact of exhaust emissions has been a major issue. In recent years, global warming, which is one of the most serious environmental problems, has drawn particular attention from society. Our company is focusing on cordless OPE that do not emit exhaust gas when used, and contribute to solving environmental problems, particularly global warming.

Our company will contribute to the realization of a decarbonized society in the future by utilizing our battery and motor technologies cultivated through the manufacture of power tools, and accelerating shifting from engine-powered to battery-powered products by proactively developing and expanding sales of cordless products whose usability is comparable to that of engine-powered products.

■Sustainability Committee Established

The role of corporations in achieving a decarbonized society is becoming increasingly important, and in 2021 we established a new Sustainability Committee chaired by the President to promote carbon neutrality. In addition to setting targets to reduce greenhouse gas emissions, we will proceed with promoting initiatives to reduce emissions, including the use of renewable energy.

■Environmental Initiatives of Head Office

We are continuously working to reduce GHG emissions by upgrading to LED lighting, improving the efficiency of air conditioning and compressors, and reducing air leakage in our plants. Last year, in addition to previous initiatives, we reduced the use of cooling air during product testing and reduced the use of water heaters in summer.

■Environmental Initiatives of Sales Offices in Japan

Solar panels are being progressively installed at our branches and sales offices in Japan, and installation has been completed at several sales offices.

[The photo shows the Okinawa branch office]

■ Environmental Initiatives of Overseas Plants

We have plants in eight countries, and approximately 90% of our production volume is produced at our overseas locations. Solar panels were installed in the Thailand plant. We will actively install them in other plants in the future.

[The photo shows the Thailand plant]

■ Environmental Initiatives of Overseas Sales Companies

We have established directly managed sales offices in approximately 50 countries around the world and are engaged in activities such as installing solar panels.

In 2022, solar panels were installed at Makita Austria and Makita Taiwan. Going forward, we will continue to actively install them at other overseas sales companies.

[The photo shows our sales subsidiary in the Austria]

Our sales subsidiary in the Germany has completed construction of a geothermal heat pump in compliance with the new energy law in Germany, and the building, which was designed with energy conservation in mind, has a cooling and heating system that uses geothermal heat and lets in natural light. (Our sales subsidiary in the Netherlands is also making similar efforts.)

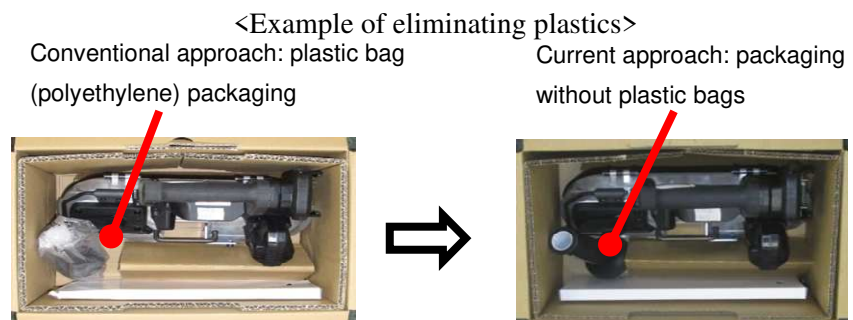

■ Introduction of biomass materials

We are introducing biomass materials to contribute to carbon neutrality. Biomass materials are used in some of our products (*1). In addition, since fiscal 2021 we have been working to replace plastic bags used for packaging with biomass plastic bags. *1 Model GA9060 series motor housing

■ Promoting the Elimination of Plastic

Due to concern about global environmental pollution in the form of plastic waste in the oceans and amid social efforts to reduce single-use plastics usage, we are working to cut back on the volume of single-use plastics in our product packaging and thereby contribute to the realization of a sustainable society and the preservation of biodiversity. In addition to our existing efforts to simplify packaging, from FYE 2021, we have been reducing the use of plastic bags by devising internal materials and switching to environmentally friendly materials such as paper and biomass plastic bags.

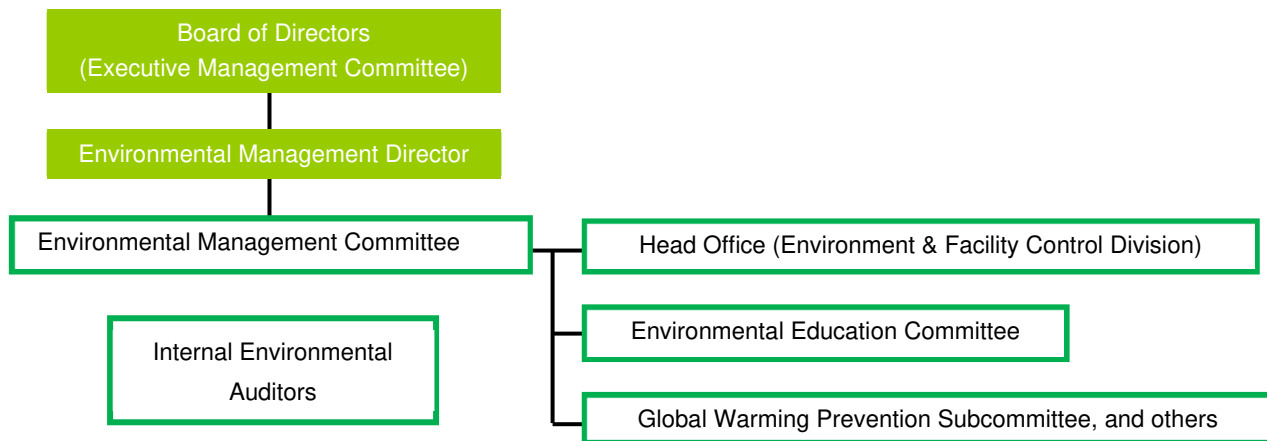

Environmental Management System

Environmental Management Promotion Framework

Recognizing environmental protection activities as a high-priority management challenge, we promote Environmental Management with the following framework.

We have the Environmental Management Committee as a body for deliberating and deciding on environmental protection activities. Environmental Management Director oversees this committee. We have also established one committee and five subcommittees under the umbrella of this committee, which promote specific environmental activities.

■ **Environmental Management Committee**
The committee addresses Company-wide environmental targets and handles tasks ranging from policy and action discussions to recognition of activity outcomes.

■ **Environmental Education Committee**
The committee plans environmental education for new employees / supervisors and reviews the texts for the education.

■ **Internal Environmental Auditors**
The auditors check compliance with legal requirements, suitability of environmental management system, reduction of environmental risk, effective environmental impact reduction objectively. The audit is also useful for sharing the knowledge between departments.

ISO14001

Makita has established and run its own environmental management system since 1998. For the purpose of leveraging that system as a tool for mitigating environmental burdens, our Head Office and Okazaki Plant first received ISO 14001 certification in 2007. In later years, our Nisshin Office and all of our overseas production bases received the certification and are now operating environmental management systems. We promote the protection of the environment at all of our business bases mentioned above and carry out activities, such as Internal Environmental Audits and environmental education, based on the requirements of the certification

■ ISO 14001 certification

All production bases have ISO 14001 certification. Except for production bases, Head Office and Nisshin Office in Japan have the certification.

JAPAN	AICHI	Head Office, Okazaki Plant, Nisshin Office
Overseas production bases	CHINA	Makita (China) Co., Ltd. / Makita (Kunshan) Co., Ltd.
	THAILAND	Makita Manufacturing (Thailand) Co., Ltd.
	UNITED STATES	Makita Corporation of America
	BRAZIL	Makita do Brasil Ferramentas Elétricas Ltda.

	UNITED KINGDOM	Makita Manufacturing Europe Ltd.
	GERMANY	Makita Engineering Germany GmbH
	ROMANIA	SC Makita EU SRL

Internal Environmental Audit

Internal environmental audits are conducted annually at all of the above ISO14001 certified bases (11 bases). We audit compliance of legal requirements, conformity of environmental management, and effectiveness in reducing environmental risks and environmental impact. Furthermore, audits serve to not only objectively audit departmental activities, but they are also useful for sharing knowhow among departments. Audit results are also reported to the president and other relevant parties.

Environmental Accounting

1) Target Period: April 1, 2022 ~ March 31, 2023) Scope: Head Office, Okazaki Plant, Nisshin Office

Environmental Conservation Cost

(Unit: thousand yen)

Category		Investment	Cost	Total	Key Activity
Business area costs	Pollution Prevention Cost	4,380	142,174	146,554	·Measurement of air and water quality, etc. ·Repair of septic tank
	Global Environmental Conservation	190,008	299,865	489,873	·Renewal of production facilities ·Change from fluorescent to LED ·Periodic inspection of equipment containing Freon
	Resource Circulation Cost	-	90,363	90,363	·Recycling and disposal of waste
Upstream/Downstream Cost		-	32,851	32,851	·Collecting and recycling packages ·Collecting and recycling small secondary batteries
Administration Cost		-	84,891	84,891	·Environmental education ·Expenses for Environmental Group's activity ·Maintenance of green area in Office and Plant
R&D Cost		-	3,498,873	3,498,873	·Development of environmentally conscious products
Social Activity Cost		-	-	-	·Participation of community activity
Environmental Remediation Cost		-	-	-	·Restoration related to groundwater pollution and soil pollution
Total		194,388	4,149,017	4,343,405	

Environmental Conservation Benefit

Detail of Benefit		Amount of Benefit					Economic Benefit (Unit: thousand yen)
		Category	Unit	2021	2022	Difference	
Business area	Benefit Related to Resources Input into Business Activities	Energy consumption	kl	6,714	5,732	-982	Reduction of energy consumption by energy saving activities
		Water usage	m ³	106,789	100,737	-6,052	11,519 (Reduction)
	Benefit Related to Waste or Environmental Impact Originating from Business Activities	GHG emissions	t-CO ₂	10,624	9,169	-1,455	Reduction of waste treatment due to resource saving and recycling
		Wastewater	m ³	70,482	73,022	2,540	
		Waste emission (total waste generated)	t	1,909 (5,907)	1,427 (3,864)	-482	
Upstream/Downstream	Benefit Related to Goods and Services Produced from Business Activities	Battery Recycling	t	31	33	2	-
other	Sale of valuables	Total volume	t	3,998	2,437	-1,561	Revenue from sales of valuable resources generated from business activities
							80,502
							Total: 100,744

Our Commitment to Creating Environmentally Conscious Products

Development of Environmentally Conscious Products

■Development of Products including New Environmental Technologies

We are working to reduce the size and weight of our products as a whole, as well as to increase their power and life by increasing the capacity of new technology motors (the DC brushless motor) and batteries, improving motor efficiency, and reducing the size and weight of power components that affect the mass of products. Furthermore, by utilizing our industry-leading battery charge and discharge technology and motor technology to promote manufacturing various rechargeable products (cordless and engineless products), we are contributing to improving user safety, convenience, and comfort, as well as reducing exhaust gas, noise, and fuel consumption. The 40Vmax series is one of the most important and powerful platforms for the future, which will further allow us to make various products cordless.

■Publication of Product Environmental Data Sheets

Since FYE 2011, we have been publishing quantitative data of the environmental performance of each of our products (product weight, noise level, the percentage of reusability and recyclability, renewable rate, efficiency, etc.) on our website, in order to give a better understanding of the environmental performance of our products.

Green Procurement

■Supply Chain Management

In order to review the status of environmental activities of our suppliers, we conduct a questionnaire survey on environmental protection activities to our suppliers (e.g., to check whether they have acquired an environmental management system certification and review specific plants subject to laws and regulations).

■Compliance with Overseas Environmental Laws and Regulations (RoHS, REACH)

Substances regulated by environmental laws and regulations are defined as Makita Prohibited and Controlled Chemical Substances. In order to ensure compliance with the European RoHS Directive, we control chemical substances to conform to the RoHS Directive.

In order to ensure compliance with the European REACH regulations, we continuously issue a survey to our suppliers to obtain information on chemical substance content because substances of very high concern (SVHC) are regularly added to the list.

Makita Prohibited and Controlled Chemical Substances

	No.	Substances	Threshold level
Prohibited Chemical Substances	1	Lead and its compounds	1,000 ppm
	2	Mercury and its compounds	1,000 ppm
	3	Cadmium and its compounds	100 ppm
	4	Hexavalent Chromium and its compounds	1,000 ppm
	5	Polybrominated biphenyls (PBBs)	1,000 ppm
	6	Polybrominated diphenyl Ethers (PBDEs)	1,000 ppm
	7~10	Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP)	1,000 ppm (each substance)
	11	Asbestos	Intentionally added
	12	Poly chlorinated Biphenyls (PCBs)	Intentionally added
	13	"Total of lead, mercury, cadmium, hexavalent chromium"	100 ppm for packaging material
	14	Restricted substances in Annex XVII of EU REACH Regulation	Conditions of restriction is specified for each substance
	Controlled Chemical Substances	SVHC in EU REACH Regulation	1,000 ppm

Environmentally Conscious Products

We design all of our products with due consideration for the environment. This section introduces some of our new products launched in FYE 2022 that contribute to solving environmental problems, improving the working environment, and improving working efficiency.

Related SDGs

40Vmax Battery Line-up

Good balance between high power and longer-life of batteries by our unique new system (optimum power supply system and optimum charging system)

Cordless Slide Compound Miter Saw
LS009G

Equipped with a high-power BL motor to cut floor materials 312mm wide and at twice the cutting speed of conventional AC machines.

Cordless microwave
MW001G

Compact and excellent portability with a maximum output of 500W that can be used to heat lunch boxes and other items at building and construction sites.

Garden Cultivator
KR001G

50mL engine type with equivalent power for easy tilling, ridge making, and weeding operations.

18V Battery Line-up

Cordless Impact Driver
TD173D

Use of LED lights emitting from a ring around the entire circumference improves usability in dark places, and the center of gravity is optimized for comfortable operability.

Cordless Rotary Hammer
HR183D

Lightweight and compact design achieved by reviewing various structures while maintaining sufficient dust collection capacity.

Cordless Grass Trimmer
MUR013G

35mL engine type equivalent high power, optimum center of gravity balance, and high torque mode for heavy load work.

Cordless Pruning Saw
MUC101D

Handy type equipped with automatic chain oil lubrication function and automatic chain tension adjustment function for good usability.

Cordless Recipro Saw
JR189D

High power BL motor and counterweight achieve high speed cutting and low vibration.

Cordless Cleaner
CL286FD

Powerful suction and low noise are achieved by installing a high-power BL motor and reviewing the motor's exhaust path.

Makita's Cordless Products that Contribute to Solving Social Issues

■ Solving the Labor Shortage and Improving the Working Environment

<Battery Powered Wheelbarrow>

Japan's agriculture is facing a serious labor shortage due to heavy labor and the aging population. It is said that 60% of agricultural work involves carrying tasks, and the wheelbarrow used for carrying loads strain the shoulders and back due to uneven surfaces. There are engine-powered transport vehicles, but you sometimes need to worry about the noise when using them early in the morning, and they take a long time to start up, need fuel (e.g., gasoline) to run, and generate exhaust gas emissions.

On the other hand, the CU180D battery powered wheelbarrow is powered by an 18V battery, which is a standard battery for other cordless tools. As it can be used in the same way as a wheelbarrow and is motor assisted, even elderly people and women can carry heavy loads with less power.

In addition, the CU600D battery powered wheelbarrow with a maximum load capacity of 300 kg. was released in fiscal 2022.

Related SDGs

< Battery Powered Pruning Shears >

For grape farms, pruning is an essential task to harvest delicious grapes every year. However, pruning manually with pruning scissors has a risk of tenosynovitis as it puts a major strain on hands and arms. The UP361D/362D battery powered pruning shears are powered by a 18V battery, which is a standard battery for other cordless tools. The combination of the blade and the trigger makes it possible to prune trees and fruit trees in the same way as a pair of scissors. The scissors are lightweight at 0.8kg, reducing the strain on the hands and arms and increasing work speed.

In addition, the UP100D battery powered pruning shears equipped with a 10.8V battery was released in fiscal 2022.

<Cordless Fan Jacket>

Due to global warming, extremely hot days are increasing, and working in a hot environment increases strain on the body and the risk of heat stroke.

The cordless fan jacket is a jacket with small fans that circulate air through the jacket to dry sweat and cool the body with the heat of vaporization. This is an item for preventing heat and can be used in places like outdoors where air conditioners or fans cannot be used.

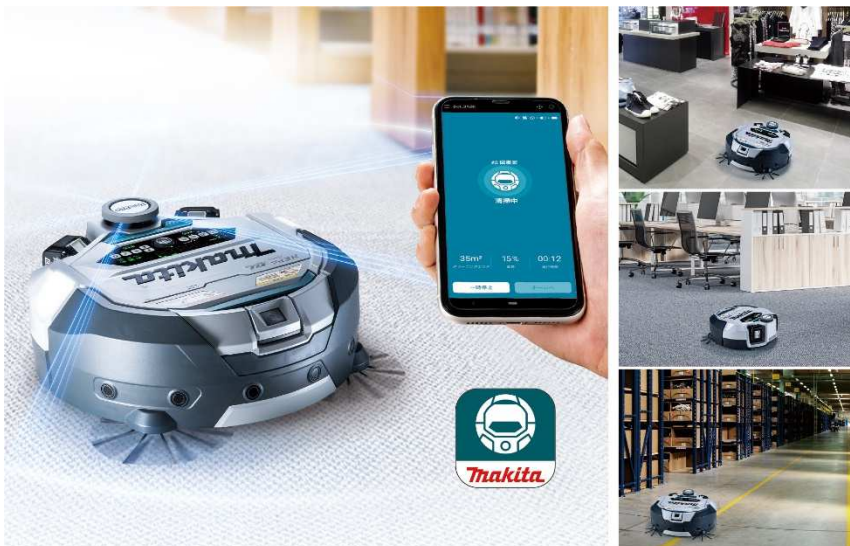

Related SDGs

<Robotic Cleaner>

Cleaning large areas, such as offices, stores, and warehouses, requires manpower. In addition, in factories where manufacturing machines are lined up, there are many areas that cannot be cleaned manually unless the machines are stopped for safety.

The robotic cleaner can automatically clean areas that require cleaning by, for example, doing work that requires bending over, which puts a strain on the back, and in very large areas. There is no need to turn on lights for cleaning or stop machines because people do not go near the manufacturing machines.

■Disaster Preparedness

< Disaster Prevention Combo Kit >

In recent years, due to frequent natural disasters caused by global warming, cordless products have attracted attention in terms of early recovery from disasters and disaster preparedness. Our disaster prevention combo kit, which is useful in case of a disaster, includes in the package a light needed in case of a power failure at night, a radio and a television to obtain correct information, and a battery and charger. It also includes a light that can charge a smartphone by connecting a USB cord.

Related SDGs

■Sustainable Society

<Cordless Outdoor Power Equipment>

In the past, most chainsaws and mowers used outdoors were engine powered. Engine-powered products are powerful and can be used for many hours, but because they generate exhaust gas emissions and noise, there are time and locational constraints on using them, and they are not easy to use because they need gasoline. The cordless OPE is an environmentally friendly product for workers and the environment, including animals and plants, because it can be used just like an engine-powered product, is low noise, and does not generate exhaust gas emissions.

CO2 calculation based on GHG protocol standards was changed in FYE 2021.

Since FYE2022, we have used IEA emission factors to convert electricity consumption.

Resource Input and Environmental Burden Emitted (Material Balance)

In order to engage in activities ranging from the development to production and sales of power tools, OPE, air tools, and household equipment, including those that are cordless, our company uses energy and water resources such as electricity and fuel, and resources as raw materials and parts (input), and discharges greenhouse gases (CO₂), chemical substances, wastewater and waste (output). The table below shows the amount of energy and resources used, as well as the number of substances with environmental impact discharged in the process of our company's business activities, from development to recovery, and we use this data to promote environmentally conscious business activities.

FYE 2023 achievements

RESOURCE INPUT

■Energy Consumption	
Electricity	100,602 MWh
District heating	6,910 MWh
Fuel	97,044 MWh
●Water Usage	364x10 ³ m ³
●Chemical Substances	610 t
●Raw Materials	
Metal	19,862 t
Non-metal	277 t
●Parts	
Metal parts	8,565 t
Plastic parts	29,513 t
Electrical parts	14,009 t

ENVIRONMENTAL BURDEN EMITTED

■Total Production Volume	
	26.35 mil. Units
■GHG Emissions	65,533 t-CO ₂
●Wastewater	334 x10 ³ m ³
▲BOD*	2.3 mg/l
●Chemical Substances (Release and Transfer Amount)	
Styrene	195 t
Xylene	3 t
Toluene	2 t
Ethylbenzene	2 t
◆Waste Emissions	21,828 t
◆Final Disposal Amount	1,080 t
▲Valuable Resources Generated	
	1,362 t
▼Batteries Recycling	33 t

Scope: ■Domestic and Overseas Business Base

- Domestic Business Base and Overseas Plants
- ◆Domestic and Overseas Plants
- ▼Domestic Business Base
- ▲Domestic Plants

Regarding raw materials and parts, items mainly used in processing and manufacturing at plants are counted.

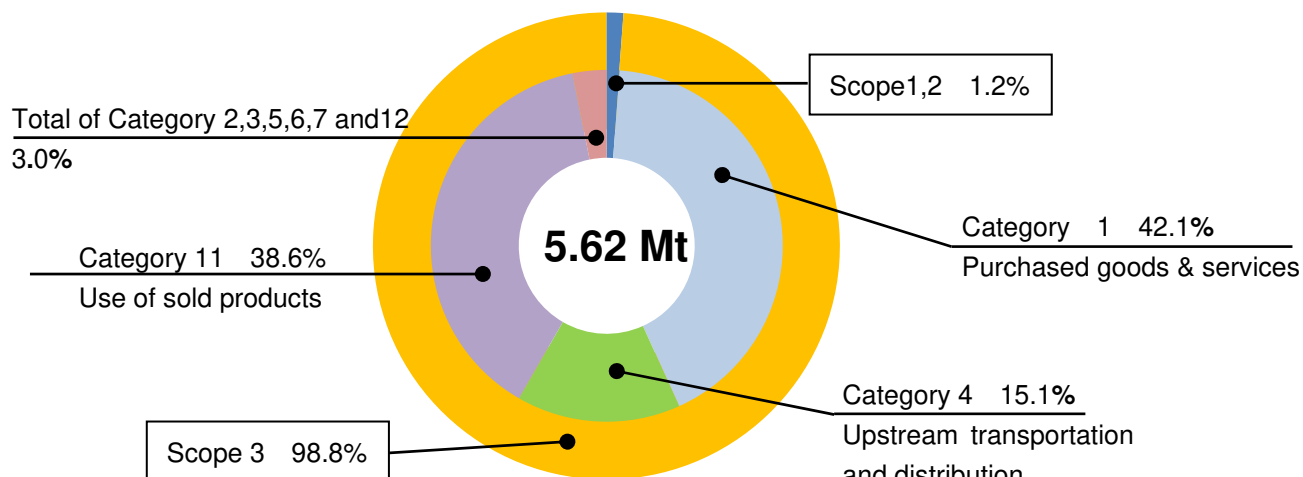

*Chemical substances: mixtures that contain Styrene, Xylene and Toluene.

*Biochemical oxygen demand: One of the indicator of water pollution

GHG Emissions throughout the Supply Chain

With reference to the international standards for calculating greenhouse gas emissions “GHG Protocol”, we calculated GHG emissions from our business activities (Scope 1 and 2) and GHG emissions from other companies related to our business activities (Scope 3).

As emissions in Category 11 (Use of Sold Products) account for approximately 40% of total emissions across the entire supply chain, we will focus on developing environmentally conscious products.

Categories	GHG Emissions in FYE2022		
	t-CO ₂	Remark	
Scope 1	21,401		
Scope 2	44,132		
Scope 3 Breakdown			
Category 1	Purchased goods & services	2,366,229	
Category 2	Capital goods	130,774	
Category 3	Fuel-and-energy-related activities not included in Scope 1 or Scope 2	11,092	
Category 4	Upstream transportation and distribution	846,507	
Category 5	Waste generated in operations	2,499	
Category 6	Business travel	2,452	
Category 7	Employee commuting	7,790	
Category 8	Upstream leased assets	-	This category does not apply to Makita business.
Category 9	Downstream transportation and distribution	-	This category does not apply to Makita business.
Category 10	Processing of sold products	-	This category does not apply to Makita business.
Category 11	Use of sold products	2,168,484	
Category 12	End of life treatment of sold products	21,106	
Category 13	Downstream leased assets	-	This category does not apply to Makita business.
Category 14	Franchises	-	This category does not apply to Makita business.
Category 15	Investments	-	This category does not apply to Makita business.

FYE 2023 Achievements Based on Our Environmental Action Plan

In order to promote the four environmental impact reduction initiatives, which are set out in the Environmental Policy, namely preventing global warming, promoting waste reduction and recycling, substitution and emission control of substances with environmental impact, and providing environmentally conscious products, we implement activities based on the Environmental Action Plan.

Environmental Action Plan

Target	Action	Achievement in FYE 2023
Preventing global warming (Reduction of GHG emissions)	Reduce company-wide energy consumption intensity by over 1% year on year	Energy consumption intensity decreased by 5.5% year on year.
Promoting waste reduction and recycling	Continue our company's slogan "Zero Waste, Zero Emissions." (Below the final disposal rate of 0.5%)	Below the final disposal rate of 0.16%
Substitution and emission control of substances with environmental impact	Promoting proper management of chemical substances	Continued necessary actions for EU RoHS Directive and EU REACH Regulation
Providing environmentally conscious products	Promote to shift to cordless and engineless	Promoted developing and expanding sales for environmentally friendly battery operated products

Targets related to GHG Emissions

The Makita Group has set goals to reduce GHG emissions from its own business activities (Scope 1 and 2) to virtually zero by fiscal 2040 (FYE 2041) and from its entire supply chain (Scope 3) to virtually zero by fiscal 2050 (FYE 2051). The mid-term target for Scope 1 and 2 is to halve the fiscal 2020 (FYE 2021) level by fiscal 2030 (FYE 2031).

Targets and results related to GHG emissions (t-CO₂)

	Fiscal 2020 (FYE 2021) results	Fiscal 2021 (FYE 2022) results	Fiscal 2022 (FYE 2023) results	Fiscal 2030 (FYE 2031) targets	Fiscal 2040 (FYE 2041) targets	Fiscal 2050 (FYE 2051) targets
Scope 1,2	89,673	78,899	65,533	44,836	Virtually zero	
Scope 3	6,006,569	7,264,652	5,556,933	---	---	Virtually zero

Environmental Initiatives in Our Business Activities

Based on the fundamental principles of creating clean plants and environmentally friendly offices, and preserving the environment from a global perspective, our company not only complies with laws and regulations, but is also working to reduce the environmental impact of our business activities by reducing the use of energy and water resources, and the emissions of chemical substances and waste.

Global Warming Prevention

GHG Emissions

Related SDGs

GHG emissions from all our domestic business bases decreased by 5.1% year on year to 13,801 tons. On a global basis, GHG emissions decreased by 16.9% year on year to 65,533 tons. This fiscal year, solar panels were installed at several sites, including the Okinawa branch in Japan and the Thailand plant, Austria, and Taiwan.

[thousand t-CO₂]

[thousand t-CO₂]

*Added overseas sales companies from 2021FYE

Total Energy Consumption

Total energy consumption by all our domestic business bases decreased by 13.5% year on year to 6,507 kiloliters. Energy consumption intensity is decreasing in the long term. We reduce energy consumption systematically to achieve the reduction of 1% required by Energy Conservation Law in Japan.

[thousand kl]

Management of Chemical Substances

The Amount of Chemical Substances Released and Transferred

The graph on the right shows the trends in the handling amount and the released and transferred amount of Class I designated chemical substances (including specific designated chemical substances) designated by the PRTR law.

Water Usage

Related SDGs

Water Resource Input

As for our domestic business bases, volume decreased by 4.2% year on year to 112,095 tons. On a global basis, volume decreased by 16.2% to 363,823 tons.

[thousand t]

Domestic Water Usage

Reduction of Emissions

The Total Volume of Waste Generated and Final Disposal Rate

The total volume of waste is linked to production volume. The final disposal rate of our domestic business bases (Head Office, Okazaki Plant and Nisshin Office) has consistently been below the final disposal rate of 0.5%, which is a target under our company's slogan "Zero Waste, Zero Emissions."

Domestic Waste Generated and Final Disposal Rate

Global Waste Generated

Recycling of Small Secondary Batteries

Based on the Act on the Promotion of Effective Utilization of Resources, we, as a recycling member of JBRC (Japan Portable Rechargeable Battery Recycling Center), are voluntarily collecting and recycling small secondary batteries, and our 130 offices in total, which include 129 sales offices (as of March 31, 2023) and Head Office, are registered as collection points.

Domestic Batteries Recycling

Environmental Communication with Local Communities

Social Contribution Activities for Local Communities

■ Volunteer Cleanup Activities

At the Okazaki Plant, we clean the east side promenade of the plant site and the drainage ditch near the parking. We will continue to participate in local activities and actively engage in environmental protection activities.

Cleaning the east side promenade of the plant (May-2022)

Cleaning the drainage ditch of the plant (May-2022)

Our Commitment to Preventing Environmental Risks

■ Compliance with Environmental Regulations

In FYE 2023, there were no major revisions to environmental laws and regulations related to our company. Our company complies with environmental laws and regulations. And we did not receive any environment-related complaints.

■ PCB Waste Management and Handling

In FYE 2023, our company do not have any stored PCB (polychlorinated biphenyl) waste. In the future, we will systematically dispose of low-concentration PCB-contaminated waste electrical equipment that is generated when transformers and other power receiving equipment are upgraded.

■ Conservation of Biodiversity

Our company is committed to conserving biodiversity company-wide by incorporating the phrase “aiming to conduct a wide range of environmental protection activities, in order to contribute to conservation of biodiversity” in the basic principles of our Environmental Policy.

We basically believe that all our environmental activities, including those aimed at reducing the environmental impact of our business activities by, for example, preventing global warming and reducing waste, lead to the conservation of biodiversity, and we promote such activities. Specific examples of such activities include promoting the greening of plant sites and making our water quality standards on water discharged into public water area stricter than laws and ordinances.

In addition, the Okazaki Plant's new distribution building, completed in 2021, is planted with indigenous species such as benthamidia japonica, machilus thunbergii, prunus yedoensis, weeping cherry, rhododendron indicum, and podocarpus macrophyllus.

Environmental History

(Letter in Green; Our History of Approach on Environment)

- Mar 1915 Founded Makita Electric Works (proprietorship) in Nagoya City. Began selling and repairing lighting equipment, motors, and transformers.
- Dec 1938 Incorporated the proprietorship's business form and established Makita Electric Works, Inc.
- Apr 1945 Moved the plant, in an attempt to avoid air raid, to the current head office in Sumiyoshi-Cho, Anjo-City.
- Jan 1958 Started marketing portable electric planers, the first product in Japan.
- May 1962 Changed the trade name to Makita Electric Works, Ltd.
- Jul 1970 Established Makita U.S.A Inc.
- Jul 1970 Established a new facility, Okazaki plant.
- Jun 1981 Established Makita Brazil Ferramentas Elébricas Ltda., and started production.
- Sep 1984 Established Makita Corporation of America. (Plant in the U.S.A, started production from Jan.1985)
- Dec 1989 Established Makita Manufacturing Europe Ltd. (Plant in the U.K, started production from Jul.1991)
- Jan 1991 Acquired Sachs Dolmar GmbH, chain saw manufacturer. (Plant in Germany)
- Apr 1991 Changed the name to Makita Corporation.
- Apr 1992 Opened Nisshin Branch
- Apr 1992 Started collection of Ni-Cd batteries.
- Mar 1993 Settled on Makita's global environment charter. (This year is called Makita's environment first year.)
- Jul 1993 Held the first meeting on environment.
- Dec 1993 Established Makita (China) Co., Ltd. (MCC, plant in China, started production from Jul.1995)
- Dec 1993 Settled on Makita's environmental voluntary plan. (Started environmental activities such as ozonosphere protection, measures for controlling global warming and industrial waste and using effective resources.)
- Sep 1995 Established Makita Ichinomiya (MIC)
- Nov 1997 Explanation concerning approach on global environment to all the foreign subsidiaries at Makita world meeting.
- Apr 1998 Started Makita's Environmental Management System.
- Nov 1998 Settled an environmental meeting at Makita world meeting.
- Dec 1998 Issued the first environmental report.
- Jan 1999 Started environmental internal audit.
- Nov 2000 Established Makita (Kunshan) Co., Ltd. (MKC, plant in Kunshan, China, started production from Jun.2002)
- Mar 2002 Received the award for recycling from the organization about clean of Gwinnett County in Georgia (Plant in the U.S.A)
- Oct 2002 Started corresponding to WEEE, RoHS. (Environmental regulations in Europe)
- Apr 2003 Finished construction of new buildings of headquarters.
- Nov 2003 Received the gold award of Green Apple Award about wastes management (Plant in the U.K.)
- Apr 2004 Set up "special meeting for compliance with European environmental regulations."
- Jul 2004 To comply with European environmental regulation, the first XRF analysis device was brought.
- Oct 2005 Announced the establishment of plant in Romania. (MMR, which started production from April 2007)
- Jan 2006 Started "Makita World Meeting" about environment (Makita overseas plants and MIC participated)
- Jan 2006 Acquired nailer business from Kanematsu-NNK Corp.
- Feb 2006 Finished construction of new building in Okazaki plant.
- Jul 2006 Participated in "Team Minus 6%,"the national CO2 reduction campaign against global warming.
- Jul 2006 To add earthquake-proof construction, started rebuilding part of Okazaki plant.
- Feb 2007 Makita world meeting: held environmental meeting with foreign plants and MIC.

May 2007	Made Fuji Robin Industries Ltd. a consolidated subsidiary. (Changed the name to Makita Numazu Corp. or MNC)
Jun 2007	Finished rebuilding of Okazaki plant.
Jul 2007	Makita Corporation (headquarters and Okazaki plant) acquired ISO14001 certificate from BSI.
Dec 2007	Broke up Makita Ichinomiya (MIC) and merged the function with headquarters and Okazaki plant.
Jan 2008	Started operation of new buildings in headquarters.
Oct 2008	Finished construction of MBR second plant in Brazil.
Oct 2008	MMR (plant in Romania) acquired ISO14001 certificate from LRQA.
Nov 2008	MCC and MKC (plants in China) acquired ISO14001 certificate from CQC.
Jan 2009	Finished production in Makita Canada and merged with MCA in the U.S.A.
May 2009	Finished construction of new building for logistics dept. in Okazaki plant.
Jul 2009	MME (plant in the U.K.) acquired ISO14001 certificate from BSI.
Aug 2009	Closed Atsugi office and merged the function with the headquarters and Okazaki plant.
Oct 2009	Opened Tokyo Technical Center.
Dec 2009	MCA (plant in the U.S.A.) acquired ISO14001 certificate from UL.
Jan 2010	Dolmar (plant in Germany) acquired ISO14001 certificate from SGS.
Mar 2010	MBR (plant in Brazil) acquired ISO14001 certificate from BSI.
Jun 2010	Joined “Turn off the light” campaign for CO2 reduction in Japan
Oct 2010	Supported COP10 (Conference of the Parties) in Nagoya.
Mar 2011	Established Makita Manufacturing Thailand.
Apr 2013	Absorbed and merged Makita Numazu Corp.
Mar 2014	Closed Numazu office and merged the function with the headquarters and Okazaki plant.
May 2014	Started the rebuilding work for Okazaki plant “building-E” in order to boost the strength against earthquakes
May 2014	Started the demolition work and soil contamination investigation for former Numazu branch
Dec 2014	Completed the demolition work and soil improvement work for former Numazu branch
Mar 2015	100th anniversary of Makita Corporation
Aug 2015	Completed the rebuilding work for Okazaki plant “building-E”
Aug 2015	Completed the soil contamination investigation for former Numazu branch
Dec 2015	Completed the soil improvement work for former Numazu branch
Jan 2016	Started the groundwater monitoring for former Numazu branch
Sep 2016	Closed Tokyo Technical Center
Jan 2018	Completed the groundwater monitoring for former Numazu branch
Feb 2018	Completed the countermeasure based on the law regarding soil contamination for former Numazu branch
Feb 2018	Received the silver award of “Aichi Environmental Award 2018” in Japan for advanced environmental technology of Makita products
Feb 2018	MMT (plant in Thailand) acquired ISO14001 certificate from Bureau Veritas.
Mar 2019	Made Amadera Kuatsu Kogyo one of Makita group’s subsidiaries
Apr 2019	Started the construction work for new distribution building in Okazaki plant
Jul 2019	Completed the construction work for the expansion of the factory (Plant in Romania)
Jan 2020	Started the construction work for No.4 factory (Plant in China)
Oct 2020	Started the construction work for new “building-D” of Head Office in Japan
Oct 2020	Announced to discontinue the manufacture of engine products in March 2022
Dec 2020	Completed the construction work for new distribution building in Okazaki plant
Aug 2021	Established a Sustainability Committee in Head Office in Japan
Sep 2021	Completed the construction work for Saitama Logistics Center in Japan
Dec 2021	Completed the construction work for new distribution building in Germany plant Completed the construction work for No.4 factory (Plant in China)
Feb 2022	Completed the construction work for new “building-D” of Head Office in Japan

- Feb 2022 Newly set targets for reducing greenhouse gas (GHG) emission at Sustainability Committee in Head Office in Japan
- Oct 2022 Completed the construction work for Okayama Logistics Center in Japan
- Dec 2022 Completed the construction work for the expansion of the factory (Plant in Thailand)
